

First Time Using Barcode Labels to Track Your Inventory ?

Here's what you need to begin:

Choose a software package to manage your inventory. Consider one designed for your specific Industry.

Choose a handheld scanner to read the barcode label.

Choose a heat seal machine that can be set to the appropriate time, temperature and pressure.

Choose barcode labels that are right for the apparel or linen that you are tracking. Consider label size, custom logo or data to include, the number of digits and the barcode symbology.

Congratulations! You now have the components to begin applying barcode labels to your apparel, linens, textile items and tracking your inventory.

For more information on application, heat seal machine settings, trouble shooting: see our website ipc-tags.com and click on 'Resources and Links' and then click on 'Application Specs for HT Labels'.

For ordering in-stock & custom labels, prices, or more information contact Amber@ipc-tags.com
